iCermax Dua Aqua Trap - John Deere Warranty

Dear Mr. Manion
National Sales Manager
iCermax™
Member of Assore Group

John Deere cannot approve nor disapprove the use of the **iCermax Duo Aqua Trap** in our John Deere engines. As long as the recommended fuel specifications as per the relevant engines Operators Manual have been met and the installation and working adhere to all our system specification and does not affect the normal operation of the engine in anyway, John Deere will not void its normal warranty.

In this regard, John Deere confirms that all their engines have to adhere to at least the South African Standard: SANS 342:2005 for Diesel in South Africa.

Based on the John Deere Warranty policy, it remains the prerogative of the end user to use any product at its sole discretion but in the unlikely event of an engine failure, no warranty will be entertained if it is proven that the fuel does not conform to the specifications as per the relevant engines Operators Manual.

Best Regards

Stephan Gouws
